

Union of Concerned Scientists  
Citizens and Scientists for Environmental Solutions

**Matching Gift Fund**

Dear xxxx,

I'm so excited to tell you about a unique opportunity for you to help the Union of Concerned Scientists put the brakes on global warming. **Recently, seven leading UCS members joined together to create an extraordinary \$1 million UCS Matching Gift Fund.**

**This is a great opportunity for you to double your impact. Your donation will be matched dollar for dollar, making it go twice as far and enabling UCS to do what we do best**—produce groundbreaking scientific analysis, develop innovative, practical solutions to problems facing our environment, and advocate for strong policies that will reign in global warming pollution.

UCS experts and others believe that while the road to achieving needed reductions in global warming pollution is steep—the next several years will present us with a once-in-a-lifetime opportunity to press for, and win, aggressive solutions to the global warming crisis.

UCS is the national organization linking scientific research and analysis with effective citizen advocacy. But for us to mobilize the most effective response to this emergency, every UCS supporter must be willing to step up and do more.

**If you've ever considered significantly increasing your support, now is the best possible time. Please make a donation today.**

UCS is mobilizing activists, scientists, and economists to speak out and put pressure on Congress to pass comprehensive, national climate legislation. As part of this effort, we have organized a major scientist sign-on statement calling for state and federal policies that will ensure swift and deep reductions in U.S. emissions of heat-trapping gases. This statement, signed by thousands of experts, will be delivered strategically this summer as lawmakers debate key global warming legislation.

Meanwhile, we are continuing our critical work to support state and regional efforts to curb global warming pollution. We're helping states across the country implement and strengthen renewable electricity standards and we're providing expertise to ensure regional plans in the Northeast, the Midwest, and on the West Coast are set up in the strongest way possible.

**Double your efforts to put the breaks on global warming! Right now, your...**

...\$40 gift is worth \$80  
...\$50 gift is worth \$100  
...\$100 gift is worth \$200

**[Donate Today. Click Here.](#)**

**With the global warming crisis reaching a critical point, each of us must strengthen our commitment to meeting this threat. Please donate today to ensure your donation will be doubled.**

UCS is uniquely positioned to seize the opportunities presented by heightened public awareness about global warming, strong pressure on policy makers to take action, and a new president in the White House. We are a trusted voice among the scientific community and in Washington, DC, and our groundbreaking scientific analysis helps steer policy makers toward the best solutions before it is too late.

**Your donation will allow us to respond quickly to the rapidly changing policy landscape in the coming months. Please make a generous donation to the UCS Matching Gift Fund today.**

Thank you for your swift and generous response.

Sincerely,

A handwritten signature in black ink that reads "Kevin Knobloch". The signature is written in a cursive, flowing style.

Kevin Knobloch  
President

**P.S.** Make a donation today to ensure it will be matched dollar for dollar. Simply click [here](#) to use our easy, online form.
