

Dear xxxx,

"And when the opposition said this just wasn't the right time, you didn't want to wait another year, or another decade, or another generation for reform. You felt the fierce urgency of now."

--President Barack Obama, March 23, 2010

Health care reform is the law of the land, and its inspiring passage has made one thing clear: At this moment in America, sweeping change really is possible.

And sweeping change is exactly what it will take to address the climate crisis and fight for clean energy here at home and around the world.

That's why we need to seize this new momentum right now. Repower America has a strong game plan to make this happen in the weeks ahead -- but we can't do it without your participation and your support.

In recognition of this crucial moment, a generous donor has agreed to match every gift we receive between now and midnight on March 31st dollar-for-dollar.

Will you make a matching donation of \$5 or more before the deadline to make sure that clean energy is the next big priority in Washington?

DOUBLE YOUR IMPACT
Make a Matching Donation of \$5 or More Before the Deadline

DONATE NOW

Change like this doesn't happen every day -- especially not in the United States Congress.

Lobbyists for many of the oil and coal companies are going to do whatever it takes to keep clean energy from being the next priority. And I don't have to tell you, they aren't afraid to play dirty.

Congress is ready to act now, and we can't let them lose their resolve.

With mid-term elections coming up in November, we have a narrow window before Washington returns to business as usual. We've got to make this happen now.

Supporters like you have already submitted tens of thousands of petitions telling the Senate to make clean energy their top priority. Now I'm asking you to take the next step by supporting our efforts to pass a strong climate and energy bill this year.

Your donation of \$5 or more will be worth \$10 if you make it before the March 31st deadline:

<http://cpaf.repoweramerica.org/We-Got-Nextnd/>

When it comes to financial resources, we're the clear underdog against the oil and coal lobbyists who have already spent hundreds of millions of dollars to stop clean energy and climate legislation.

But that's an advantage we can overcome if grassroots supporters like you stand up at this moment to show your passion and commitment.

That's how we're going to win, and I'm honored to have you on my team.

Thanks,

Al Gore
