

Dear xxxx ,

This is silly. Once again, we're being held hostage by the big energy companies, and we're paying for it at the pump. Some people think more drilling is going to help, but that sort of flawed thinking is what got us into this mess to begin with. Instead of prolonging our addiction to oil, we need to look beyond fossil fuels and invest in new solutions. [It's time to get real about our energy options.](#)

Why remain captive to skyrocketing fuel prices when we can develop an economy based on efficient transportation and clean, free sources of energy (like the sun and wind)?

The We Campaign is about coming together to demand the smart, dependable and reasonably priced energy that we deserve. Energy that will strengthen the economy and stop global warming. [Click here to help break our addiction to fossil fuels.](#)

We are a great country -- with fantastic resources -- and we will not be held hostage by dirty energy companies.

[Be a voice for real solutions today.](#)

Sincerely,

Cathy Zoi
CEO
